

Reduce the risk of child trafficking through TikTok

TikTok is a hunting ground for traffickers in Japan.

From January 2021, the following online safety improvements are available that can reduce the risk of children being approached by traffickers.

These improvements are a big step in the right direction, but your child is still at risk! Share an account with your child to make sure you keep a close eye on their activities.

- **Tightening the options for commenting on videos created by those ages 13-15. These users can now choose between Friends or No One for their account; the Everyone comment setting is being removed.**
- **Changing Duet and Stitch settings to now make these features available on content created by users age 16 and over only. For users ages 16-17, the default setting for Duet and Stitch will now be set to Friends.**
- **Allowing downloads of videos that have been created by users 16 and over only. Other users can decide whether they want to allow downloads of their videos, though for users ages 16-17 the default setting will now be changed to Off unless they decide to enable it.**
- **Setting "Suggest your account to others" to Off by default for users ages 13-15.**
